## About Brad

If you want a speaker who tells the same old stories, and is funny and fluffy, Brad is not your speaker.

If you want hard hitting lessons that are high energy, memorable and told in a light-hearted way then look no further.

Brad's five-year journey of proving his innocence in a Global Securities Fraud Investigation conducted by the F.B.I and S.E.C. taught him more about leadership than running companies ever did. A journey he has been obsessed with extracting lessons from that he now passes onto leaders around the world.

A gifted entrepreneur and consultant, Brad created three international startups in the Enterprise Computing space, all which had successful exits. He also advised the most Senior IT Executives in the world from organisations such as Swisscom, Union Bank of Switzerland, Visa and Commonwealth Bank of Australia and is known as one of the pioneers in the Enterprise Cloud Computing Space.

In 2015 his life was disrupted and for over 5 years, he sat with the pressure every day of losing his freedom, his family and everything he ever worked for.

Brad stood firm in his truth, took on the F.B.I at their own game and reclaimed everything and more.
